

The Stormin' Normans – Norman Castle

The Normans invaded England in 1066 and proceeded to take over the whole country. They built strong stone castles to protect themselves as they carried out their campaigns.

Instructions for castle

Towers – cut out crenulations in the tops of four kitchen roll tubes. Then cut 2 long slits at the bottom of the tubes for the walls to be at right angles to each other.

Walls – copy the template walls onto card (or onto paper and stick onto cereal box card);

- cut out crenulations and a door

Then cut long slits down the end of each wall to slot into the towers

Slot the pieces together to make a castle and use to play with your small world figures.
